How Many Ontarians are Facing Elder Abuse?

Elder abuse is a serious and growing problem, although the magnitude and extent of the elder abuse cases occurring in Canada is not well known, due to limited data collected and unreported cases.

There are currently 2 million seniors aged 65 and over residing in Ontario 14.6 % of the population. Based on studies that indicate approximately 6% to 10% percent of seniors are abused, there are between 120,000 and 400,000 seniors living in Ontario who have experienced or are experiencing elder abuse.

IMPACT ON SENIORS HEALTH

- ▶ Elder abuse can have a significant impact on the physical and emotional well-being of seniors.
- ▶ The emotional consequences of abuse often result in seniors living in fear, anxiety and depression. Physical abuse can cause cuts, bruises, broken bones, leading to pain and in some cases death.

WHO ABUSES?

- ▶ Committed by people that the senior knows; it frequently involves a spouse or other family member, friends, professional service providers, neighbours or any person who is in a position of power and trust.

REPORTING

Seniors are reluctant to report because they:

- ▶ Fear retaliation – afraid of what the abuser will do to them if they report the abuse
- ▶ Depend on the abuser for food, shelter, clothing, and health care
- ▶ Fear they will be placed in an institution, such as a Long-Term Home
